MIA for the 2030 agenda sustainable development

The MIA improvement programme is inspired by the 17 Sustainable Development Goals (SDGs) of the United Nations 2030 Agenda for Sustainable Development and, in particular, contributes to the implementation of the following sustainability objectives:

Environmental Objectives

- Dematerialization of paper products
- Preference of Km0 suppliers
- Awareness on sustainable mobility and accommodation
- Waste reduction and promotion of separate collection

Ethical-Social and Economic Objectives

- Inclusion and accessibility
- Preference of suppliers with ethical-social principles
- Enhancement of typical local products
- Implementation of anti-contagion protocol

The Management of MIA is committed to ensuring that the management system implemented and certified ISO 20121 is oriented, in the various editions, to the continuous improvement of the Festival's sustainability performance and to operate in full compliance with regulations.

MIA's sustainability policy will be constantly monitored and updated in order to ensure over time the effective and sustainable reduction of environmental impacts and the enhancement of economic and ethical-social benefits.
